

We connect products. Leitwert leverages the potential of digital technologies to enable new value creating solutions for the key challenges in industry and healthcare. Based on our expertise in electronics, asynchronous programming and web technologies we develop modular solutions to revolutionize the industrial and health care sector. We are competent on every level of the IoT stack.

Join our team as

Back End Software Engineer (f/m)

Your role.

You are our Back-End Software Engineer who develops server back ends and elaborates stable software solutions for our challenging custom client projects. You are part of the advancement of our in-house IoT enablement platform.

Your responsibilities.

- You design and implement new business solutions based on our IoT platform
- You conceptualize customer client projects and model possible solutions with a database and software design
- You keep track of the time and money budget of your projects
- You write unit tests to ensure proper function of code
- You review code of your team members and work in close collaboration with the front end developers
- You support the business development team with your technical expertise

Your profile.

You have a positive, proactive and open personality. You work independently and easily adapt to new challenges. You convince with your hands-on working attitude.

And you have:

- >5 years of hands on experience in backend design and development
- Exceptional programming skills in Python
- Experience in source code version control (Git) and unit testing
- Experience with SQL/NoSQL database (PostgreSQL, mongoDB)
- Fluent language skills in English (German is advantageous)

Preferably you also have:

- Experience with python-based backend frameworks: Django preferred (or any other: Flask, Pyramid, ...)
- Experience with DevOps and Linux System Administration
- Experience in data storage and data analytics pipelines
- Knowledge of Docker
- Software project management experience

Our offer.

Leitwert offers diverse project-based work in a highly motivated team of experienced developers. With our start-up spirit we trust in everyone's ability to create great stuff and count on the success of our dynamic interdisciplinary teams. We empower the people to actively shape the corporate culture. Our office is in Zurich nicely situated right next to the lake. Together with you we invent the world of tomorrow.

Do you want to convince us with your elegant code? In that case, we'd be delighted to have you on board.
